

The radio station KLove is so important to me and thousands of others in my area I listen to it every morning. As a community it is a beneficial aspect you never have to worry what is playing on the station it is a christian radio station no volger language no explicit comments. Can keep it on 24/7 sometimes my kids even fall asleep to it. I would be deviated if Klove was taken off the air. Not only does it effect me but the thousands of our youth listening to something positive and encouraging instead of listening to music that promotes sex,violence,volger language and leads down the path of negative thinking, suicide. In a world where our society is spiriling at a rapid pace we have a chance to make an impact on the younger and older adults in our society to make a difference for them to have a chance to hear something positive that they might have a chance to change there way of thinking.
